

debris pool covers

clean pools get used

what is a debris cover?

A must for pools in leafy, green New Zealand. Our quality, mesh swimming pool debris covers mean no more pool cleaning. The BMH debris cover overlaps the swimming pool by about 250mm to effectively keep your pool clean from leaves, branches, twigs and rubbish in the winter months, or when you're not swimming in your pool for extended periods.

Using tensioning straps the cover is pulled tight, preventing it from sagging into the pool. The mesh material allows water through, but it stops the majority of the dirt and rubbish from getting into your pool.

benefits of a debris cover

- Reduces pool cleaning
- Reduces pool discolouration
- Traps leaves, dirt, insects etc
- Most shapes possible

Call us to discuss your options.

application & construction

Ideal for residential, school and commercial swimming pools. BMH pool debris covers are generally used in the off season.

Made from high grade woven P.E. mesh debris covers provide protection against ultra-violet light due to material containing U.V. inhibitors. Stainless hooks are permanently attached to adjustable tensioning straps around the pool perimeter. Holes are drilled into the surrounding deck to take these hooks. When the cover is removed all that is left are the small holes.

Covers are custom shaped to match your pool and are made with an anti-chafe strip to resist wear around the edge.

debris cover unique features

- Durable construction
- Secures to coping/deck
- Allows rain to filter through
- 36 month warranty
- Available in Blue or Green
